# 1. Introduction

This test plan outlines the testing strategy for the "Track and Manage Parcel Deliveries" functionalities on the Cargus website. The purpose is to ensure that users can efficiently track and manage parcel deliveries, find Ship & Go locations, and return parcels.

## 1.1. Project Objective

The primary objective is to verify and validate that the Cargus website allows users to track parcels, find the nearest Ship & Go locations, and manage parcel returns effectively and accurately.

## 1.2. Functionalities in Scope

Epic: Track and Manage Parcel Deliveries

Story 1: Track a Parcel by Tracking Number

Track parcel with valid tracking number.  
Handle invalid tracking numbers.  
Redirect correctly on "Urmărește" button click.

Story 2: Find a Ship & Go Location

Redirect to the Ship & Go page.  
Display nearest locations based on address or postal code.  
Validate map functionalities.

Story 3: Return a Parcel

Redirect to return instructions page.  
Complete return form and generate a return label.  
Confirm return request.

## 1.3. Functionalities and Tests Out of Scope

Backend integration and performance testing.  
Security testing (to be covered separately).  
Non-functional requirements such as performance under load and stress.  
Payment gateway functionalities and related tests.

## 2. Test Process

The test process will follow the ISTQB guidelines, ensuring systematic and thorough testing from planning to closure.

### 2.1. Test Planning

Approach:

Functional testing to validate each user story.

Positive and negative test cases to ensure robustness.

Exploratory testing to identify additional issues not covered by predefined test cases.

Test Levels:

Unit Testing

Integration Testing

System Testing

User Acceptance Testing (UAT)

Entry Criteria:

- Test cases are prepared and reviewed.
- Test environment is set up and stable.
- Necessary test data is available.

Exit Criteria:

- All test cases are executed.
- All critical and high-severity bugs are resolved.
- Test coverage meets the defined acceptance criteria.

## 2.2 Test Analysis

.Objective: Analyze the requirements and acceptance criteria for each user story to derive the necessary test conditions.

Project Context: The project involves implementing and testing functionalities on the Cargus website, specifically for tracking parcels, finding Ship & Go locations, and returning parcels.

User Stories and Derived Test Conditions

User Story 1: AIT\_23 – Track a Parcel by Tracking Number

Description: As a user, I want to be able to track my parcel using the tracking number so that I can see the current status and location of my parcel.

Acceptance Criteria:

1. Given I am on the Cargus homepage, when I enter my tracking number in the "Introdu numărul de tracking (AWB)" field and click "Urmărește," then I should be redirected to a page displaying the current status and location of my parcel.

Derived Test Conditions:

1. Verify that the "Introdu numărul de tracking (AWB)" field is present on the Cargus homepage.
2. Verify that the "Urmărește" button is present and clickable on the Cargus homepage.
3. Verify that entering a valid tracking number and clicking "Urmărește" redirects to the tracking details page.
4. Verify that the tracking details page displays the current status and location of the parcel.

User Story 2: AIT\_24 – Find a Ship & Go Location

Description: As a user, I want to be able to find a Ship & Go location so that I can send and receive parcels conveniently.

Acceptance Criteria:

1. Given I am on the Cargus homepage, when I click on "Găsește un SHIP & GO," then I should be redirected to a page where I can search for Ship & Go locations.

Derived Test Conditions:

1. Verify that the "Găsește un SHIP & GO" link or button is present on the Cargus homepage.
2. Verify that clicking the "Găsește un SHIP & GO" link or button redirects to the "Găsește un SHIP & GO" page.
3. Verify that the "Găsește un SHIP & GO" page displays a search field for Ship & Go locations.
4. Verify that the map on the "Găsește un SHIP & GO" page correctly displays the locations.

User Story 3: AIT\_25 – Return a Parcel

Description: As a user, I want to be able to return a parcel so that I can send it back to the sender.

Acceptance Criteria:

Given I am on the Cargus homepage, when I click on "Returnează un colet," then I should be redirected to a page with return instructions.

Derived Test Conditions:

Verify that the "Returnează un colet" button is present on the Cargus homepage.

Verify that clicking the "Returnează un colet" button redirects to the return instructions page.

Verify that the return instructions page provides detailed information on how to return a parcel.

Test Cases Based on Derived Conditions

Test Case ID: AIT\_26

Title: Verify parcel tracking by valid tracking number. Test Conditions:

Verify the presence of the tracking field and button.

Verify the redirection to the tracking details page.

Verify the display of parcel status and location.

Test Case ID: AIT\_27

Title: Verify error handling for invalid tracking number. Test Conditions:

Verify error message display for invalid tracking number input.

Test Case ID: AIT\_28

Title: Verify tracking with an empty tracking number field. Test Conditions:

Verify error message display for empty tracking number field.

Test Case ID: AIT\_31

Title: Verify the functionality of the "Urmărește" button. Test Conditions:

Verify the button's presence and clickability.

Verify the redirection to the appropriate page on click.

Test Case ID: AIT\_32

Title: Verify redirection to the Ship & Go Page from the main page. Test Conditions:

Verify the presence of the "Găsește un SHIP & GO" link or button.

Verify the redirection to the "Găsește un SHIP & GO" page.

Verify the display of the search field and map on the "Găsește un SHIP & GO" page.

Test Case ID: AIT\_33

Title: Selecting Satu Mare, Romania from Valid City Input on www.cargus.ro. Test Conditions:  
Verify that entering "Satu Mare" in the search field displays the correct location on the map.  
Verify that the location details are displayed correctly for Satu Mare.

Test Case ID: AIT\_35

Title: Testing "Adresa" Button for Closest Cargus Location Retrieval. Test Conditions:  
Verify that clicking the "Adresa" button retrieves and displays the closest Cargus locations on the map.

Test Case ID: AIT\_36

Title: Testing Zoom In and Zoom Out Features on Map View. Test Conditions:  
Verify the functionality of the zoom in and zoom out buttons on the map view.

Test Case ID: AIT\_37

Title: Verify Detailed Information when Selecting an Address from the List. Test Conditions:  
Verify that selecting an address from the list displays detailed information about the location.

Test Case ID: AIT\_39

Title: Verify Redirection to Return Instructions Page when Clicking on "Returnează un colet" Button. Test Conditions:  
Verify the redirection to the return instructions page upon clicking the "Returnează un colet" button.

Test Case ID: AIT\_40

Title: Verify Redirection to Return Instructions for Different Methods when Clicking on Hyperlinks. Test Conditions:  
Verify that clicking on hyperlinks on the return instructions page redirects to the respective return methods.

## 2.3 Test Design

Design test cases based on the identified test conditions, ensuring coverage of all acceptance criteria and potential edge cases.

### AIT\_26. Verify parcel tracking by valid tracking number

Description: Ensure that tracking a parcel by entering a valid tracking number returns the correct parcel details and current status.

Preconditions:

1. User is on the Cargus homepage.

Test steps:

1. Navigate to the Cargus homepage.
  - Input `http://www.cargus.ro`
  - Expected result: Cargus homepage is displayed.
2. Enter a valid tracking number in the "Introdu numărul de tracking (AWB)" field.
  - Input `1083314854`
  - Expected result: The tracking number is entered in the field.
3. Click the "Urmărește" button.
  - Expected result: User is redirected to a page displaying the current status and location of the parcel corresponding to the entered tracking number.

Expected Results:

1. User is redirected to a page displaying the current status and location of the parcel corresponding to the entered tracking number.
2. The parcel details are accurate and match the tracking number provided.

### AIT\_27. Verify error handling for invalid tracking number

Description: Ensure that an appropriate error message is displayed when an invalid tracking number is entered.

Preconditions:

1. User is on the Cargus homepage.

Test Steps:

1. Navigate to the Cargus homepage.
2. Enter an invalid tracking number ( `0987654321` ) in the "Introdu numărul de tracking (AWB)" field.
3. Click the "Urmărește" button.

Expected Results:

1. An error message is displayed indicating that no results were found for the entered tracking number.
2. No parcel details are displayed.

## AIT\_28.Verify tracking with an empty tracking number field

Description: Ensure that an appropriate error message is displayed when the tracking number field is left empty and the user attempts to track a parcel.

Preconditions:

1. User is on the Cargus homepage.

Test Steps:

1. Navigate to the Cargus homepage.
2. Leave the "Introdu numărul de tracking (AWB)" field empty.
3. Click the "Urmărește" button.

Expected Results:

1. An appropriate error message is displayed indicating that the tracking number field cannot be empty.
2. No redirection to a new page occurs. The user remains on the Cargus homepage.

## AIT\_31.Verify the functionality of the "Urmărește" button

Description: Ensure that the "Urmărește" button functions correctly when a valid tracking number is entered, an invalid tracking number is entered, and when the tracking number field is left empty.

Preconditions:

- User is on the Cargus homepage.
- The "Introdu numărul de tracking (AWB)" field and "Urmărește" button are visible.

Test Steps:

1. Step 1: Valid Tracking Number
  - Enter a valid tracking number (e.g., "1083314854") in the "Introdu numărul de tracking (AWB)" field.
  - Click the "Urmărește" button.
2. Step 2: Invalid Tracking Number
  - Enter an invalid tracking number (e.g., "0987654321") in the "Introdu numărul de tracking (AWB)" field.
  - Click the "Urmărește" button.
3. Step 3: Empty Tracking Number Field
  - Leave the "Introdu numărul de tracking (AWB)" field empty.
  - Click the "Urmărește" button.

Expected Results:

Expected Result for Step 1:

1. The user is redirected to a page displaying the current status and location of the parcel associated with the tracking number "1083314854".
2. The page shows delivery details such as the status "LIVRAT LA DESTINATAR (CONFIRMAT)".

Expected Result for Step 2:

1. An error message is displayed indicating that the tracking number is invalid or not found.
2. The user remains on the current page without redirection.

Expected Result for Step 3:

1. An error message is displayed indicating that the tracking number field cannot be empty.
2. The user remains on the current page without redirection.

### AIT\_32.Verify Redirection to Ship & Go Page

Description: This test case verifies that clicking on "Gaseste un Ship and Go" on the main website page successfully redirects the user to the Ship & Go search page.

Preconditions:

1. The website is accessible and the main page is fully loaded.
2. The "Gaseste un Ship and Go" section or button is visible and clickable on the main website page.
3. The Ship & Go feature is functional and available for users to interact with.
4. The user has a stable internet connection to support the redirection and loading of the new page.

Test Steps:

1. Navigate to the main website page.
2. Click on "Gaseste un Ship and Go".
3. Verify that the user is successfully redirected to a new page.
4. Check that the new page contains the functionality to enter a search query for a Ship & Go location.

Expected Results:

- The user should be redirected to a new page with the functionality to search for Ship & Go locations.
- The new page should contain the search functionality for Ship & Go locations.

### AIT\_33.Selecting Satu Mare, Romania from Valid City Input on [www.cargus.ro](http://www.cargus.ro)

Description: This test case verifies the functionality of entering a valid city (Satu Mare) and selecting the correct city from the returned list (Satu Mare, Romania) in the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

Preconditions:

1. The website [www.cargus.ro](http://www.cargus.ro) is accessible and running.
2. The "Gaseste o locatie Ship & Go" feature is visible and accessible.
3. The user has navigated to the location search field within the "Gaseste o locatie Ship & Go" feature.

Test Steps:

1. Navigate to the website [www.cargus.ro](http://www.cargus.ro).
2. Access the "Gaseste o locatie Ship & Go" feature.
3. Enter "Satu Mare" in the location search field.
4. Wait for the list of suggestions to be populated.
5. Select "Satu Mare, Romania" from the list of suggestions.

Test Data:

- Input: "Satu Mare"
- Expected Output: "Satu Mare, Romania" is selected from the list of suggestions.

Expected Results:

- Upon selecting "Satu Mare, Romania" from the list of suggestions, the location input field should display "Satu Mare, Romania" and the corresponding location should be set for further use within the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

Pass Criteria:

- The selected location "Satu Mare, Romania" is accurately reflected in the location input field within the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

### AIT\_35.Testing "Adresa" Button for Closest Cargus Location Retrieval

Description: Verify the functionality of the "Adresa" (Address) button to return the closest Cargus location to the address entered (Satu Mare, Fabricii 4) within the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

Preconditions:

1. The website [www.cargus.ro](http://www.cargus.ro) is accessible and running.
2. The "Gaseste o locatie Ship & Go" feature is visible and accessible.
3. The user has navigated to the address input field within the "Gaseste o locatie Ship & Go" feature.

Test Steps:

1. Navigate to the website [www.cargus.ro](http://www.cargus.ro).
  - Expected Result: The website is accessible and loaded successfully.
2. Access the "Gaseste o locatie Ship & Go" feature.
  - Expected Result: The "Gaseste o locatie Ship & Go" feature is accessible.
3. Enter "Satu Mare, Fabricii 4" in the address input field
  - Expected Result: The address "Satu Mare, Fabricii 4" is entered in the address input field.
4. Click on the "Adresa" button.
  - Expected Result: The system should process the entered address and return the closest Cargus location relative to the address entered.

Pass Criteria:

The system should successfully return the closest Cargus location to the address "Satu Mare, Fabricii 4" upon clicking the "Adresa" button within the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

### AIT\_36.Testing Zoom In and Zoom Out Features on Map View

Description: Validate the functionality of the zoom in and zoom out features on the map view of the "Gaseste o locatie Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro).

Preconditions:

1. The website [www.cargus.ro](http://www.cargus.ro) is accessible and running.
2. The "Gaseste o locatie Ship & Go" feature is visible and accessible.
3. The map view is displayed within the "Gaseste o locatie Ship & Go" feature.

Test Steps:

1. Navigate to the website [www.cargus.ro](http://www.cargus.ro).
  - Expected Result: The website is accessible and loaded successfully.
2. Access the "Gaseste o locatie Ship & Go" feature.
  - Expected Result: The "Gaseste o locatie Ship & Go" feature is accessible.
3. Navigate to the map view within the "Gaseste o locatie Ship & Go" feature.
  - Expected Result: The map view is displayed with the default zoom level.
4. Zoom in on the map. Use the zoom in functionality to enlarge the map view.
  - Expected Result: The map view should zoom in, displaying a closer view of the selected area.
5. Verify the details and clarity of the zoomed-in map. Visual inspection of the enlarged map view.
  - Expected Result: The details on the map are more granular, and the view accurately represents a closer area.
6. Zoom out on the map. Use the zoom out functionality to reduce the map view.
  - Expected Result: The map view should zoom out, displaying a wider view of the selected area.
7. Verify the details and clarity of the zoomed-out map. Visual inspection of the reduced map view.
  - Expected Result: The details on the map are less granular, and the view accurately represents a wider area.

Pass Criteria:

The zoom in and zoom out features should effectively change the map view to provide closer and wider perspectives, respectively, with clear and accurate details at each level.

## AIT\_37.Verify Detailed Information when Selecting an Address from the List

### Description:

Validate if selecting one address from the list returns the location's details such as photo, name, address, hours (orar), and payment methods (metode de plata) on [www.cargus.ro](http://www.cargus.ro).

### Preconditions:

1. The website [www.cargus.ro](http://www.cargus.ro) is accessible and running.
2. The "Gaseste o locatie Ship & Go" feature is visible and accessible.

### Test Steps:

1. Navigate to the Website:
  - Input: Open a web browser and navigate to [www.cargus.ro](http://www.cargus.ro).
  - Expected Result: The website is accessible and loads successfully.
2. Access "Gaseste o locatie Ship & Go": Navigate to and click on the "Gaseste o locatie Ship & Go" feature.
  - Expected Result: The "Gaseste o locatie Ship & Go" feature is accessible.
3. Enter City Name "Satu Mare":
  - Input: Enter "Satu Mare" in the designated search field.
  - Expected Result: The input "Satu Mare" is entered, and the list of addresses in Satu Mare starts to populate.
4. Select an Address: From the list of addresses, select one by clicking on it.
  - Expected Result: The selection should trigger the display of the location's details.
5. Verify Location Details – Photo: Visually inspect the displayed information.
  - Expected Result: A photo of the selected location is displayed.
6. Verify Location Details – Name: Check the displayed name of the location.
  - Expected Result: The name of the location is correctly displayed.
7. Verify Location Details – Address: Check the displayed address of the location.
  - Expected Result: The address of the location is correctly displayed.
8. Verify Location Details – Hours (Orar): Check the displayed hours of the location.
  - Expected Result: The hours of operation (Orar) are correctly displayed.
9. Verify Location Details – Payment Methods (Metode de Plata): Check the displayed payment methods.
  - Expected Result: The available payment methods (Metode de Plata) are correctly displayed.

### Pass Criteria:

- All details (photo, name, address, hours, payment methods) should be correctly displayed for the selected address.

### **AIT\_39.Verify Redirection to Return Instructions Page when Clicking on "Returnează un colet" Button**

#### Description:

Confirm that clicking on the "Returnează un colet" button on the Cargus homepage redirects the user to a page containing instructions on how to return a parcel.

#### Preconditions:

The Cargus homepage is accessible and running.  
The "Returnează un colet" button is visible and functional.

#### Test Steps:

1.Navigate to the Cargus Homepage: Open a web browser and go to the Cargus homepage.

Expected Result: The Cargus homepage loads successfully.

2. Locate the "Returnează un colet" Button: Look for the "Returnează un colet" button on the homepage.

Expected Result: The "Returnează un colet" button is visible and clickable.

3. Click on the "Returnează un colet" Button.

Expected Result: The click action should redirect the user to a new page.

4. Verify Page Redirection: Check the URL and content of the new page: <https://www.cargus.ro/personal/returneaza-coletul/>

Expected Result: The user should be redirected to a page specifically providing instructions on how to return a parcel.

5. Verify Instructions Content provided on the redirected page.

Expected Result: The page should contain detailed instructions guiding the user on the process of returning a parcel, including steps to follow and any requirements.

#### Pass Criteria:

Clicking on the "Returnează un colet" button should lead to the redirection to a page with clear instructions on how to return a parcel.

**AIT\_40.Verify Redirection to Return Instructions for Different Methods when Clicking on Hyperlinks**

Description:

Validate the behavior of clicking on the hyperlinks provided for returning a parcel using different methods, ensuring the user is redirected to the correct instructions section based on the selected method.

Preconditions:

- 1.Access to the Cargus website or mobile application.
- 2.Hyperlinks for return methods are available and functional.

Test Steps:

- 1.Click on "FOLOSIND FORMULARUL DE RETUR" Hyperlink.
  - Expected Result: The user should be redirected to the instructions section on the same page detailing the return process using a return form (Metoda 1).
- 2.Click on "Returnează coletul din contul tău My Cargus sau din aplicația Cargus Mobile" Hyperlink (Metoda 2).
  - Expected Result: The user should be redirected to the corresponding section providing instructions on how to return a parcel using their My Cargus account or the Cargus mobile application (Metoda 2).
- 3.Click on "FOLOSIND CODUL DE RETUR" Hyperlink (Metoda 3).
  - Expected Result: The user should be redirected to the section containing information on returning a parcel using a return code (Metoda 3).
- 4.Verify Instructions for "Metoda 1" Section: Locate and review the instructions provided in the "Metoda 1" section.
  - Expected Result: Detailed instructions on how to initiate a return using the return form should be visible on the same page after clicking the corresponding hyperlink.
- 5.Verify Instructions for "Metoda 2" Section: Locate and review the instructions provided in the "Metoda 2" section.
  - Expected Result: Clear instructions on returning a parcel from My Cargus account or the Cargus Mobile application should be visible after clicking the corresponding hyperlink.
- 6.Verify Instructions for "Metoda 3" Section: Locate and review the instructions provided in the "Metoda 3" section.
  - Expected Result: Instructions on returning a parcel using a return code should be displayed after clicking the corresponding hyperlink.

Pass Criteria:

- Clicking on each hyperlink should redirect the user to the appropriate section containing instructions for the corresponding return method (Metoda 1, Metoda 2, Metoda 3).

**2.4 Test Implementation**

Prepare test data and set up the test environment according to the test cases designed.

**2.5 Test Execution**

Execute the test cases in the planned test environment, log results, and report any defects found.

**2.6 Test Closure**

Ensure all test cases are executed.

Verify that all critical defects are resolved.

Document test summary report and obtain sign-off from stakeholders.

**2.7 Test Monitoring and Control**

Monitor test progress and quality through regular status reports. Adjust plans as necessary to address any deviations.

**3. Test Deliverables**

Test Plan Document

Test Cases

Test Execution Report

Bug Reports

Test Summary Report

**3.1 Test Plan**

This document, outlining the test strategy, scope, schedule, resources, and deliverables.

3.2 Test Conditions

Valid and invalid tracking number inputs.  
Redirection on button clicks.  
Address and postal code inputs for Ship & Go locations.  
Return form submission and label generation.

3.3 Test Cases

Verify parcel tracking by valid tracking number.  
Verify error handling for invalid tracking number.  
Verify the functionality of the "Urmărește" button.  
Verify tracking with an empty tracking number field.  
Verify redirection to Ship & Go page.  
Select Satu Mare, Romania from valid city input.  
Test "Adresa" button for closest Cargus location retrieval.  
Test zoom in and zoom out features on map view.  
Verify detailed information when selecting an address from the list.  
Verify redirection to return instructions page when clicking on "Returnează un colet" button.  
Verify redirection to return instructions for different methods when clicking on hyperlinks.

## 3.7. Bugs Report

Projects /  Alina Ionescu\_T142 /  AIT-22 /  AIT-38

Photo Not Displayed, Shows "Pudo Point" Message in Location Details

 Attach  Create subtask  Link issue 

Description

**Description:**  
After selecting an address from the list within the "Găsește o locație Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro) and verifying the location details, the photo of the selected location is not displayed as expected. Instead, a message "Pudo Point" appears in place of the photo, indicating a display error or missing image resource.

**Steps to Reproduce:**  
1. Navigate to [www.cargus.ro](http://www.cargus.ro) and access the "Găsește o locație Ship & Go" feature.  
2. Enter the city name "Satu Mare" in the search field to display a list of addresses.  
3. Select the address: "PUNCT ADJ ENDRÉ 16 SATU MARE, Strada Adj Endre, Nr. 16, Cod postal: 440075" from the list and verify the location details.  
4. Observe that the photo of the selected location is not displayed.  
5. Instead of the photo, a message "Pudo Point" is shown in the photo section.

**Expected Result:**  
When selecting an address and verifying the location details within the "Găsește o locație Ship & Go" feature, the photo of the selected location should be displayed correctly, providing visual representation of the location to the user.

**Actual Result:**  
The photo of the selected location is not displayed, and a message "Pudo Point" appears instead of the photo, indicating a display issue or missing image resource.

Incorrect Priority of Suggestions in "Găsește o locație Ship & Go" Feature

 Attach  Create subtask  Link issue 

Description

Add a description...

Environment

**Description:**  
When entering "Satu Mare" in the location search field of the "Găsește o locație Ship & Go" feature on [www.cargus.ro](http://www.cargus.ro), the first suggestion in the list is not based on the entire entered phrase "Satu Mare". Instead, the suggestion appears to be based on the individual words, example: "mare." This results in locations not directly related to "Satu Mare" being displayed first in the suggestions list, potentially causing confusion for users.

**Steps to Reproduce:**  
1. Navigate to [www.cargus.ro](http://www.cargus.ro).  
2. Access the "Găsește o locație Ship & Go" feature.  
3. Enter "Satu Mare" in the location search field.  
4. Observe the suggestions list that populates.

**Expected Result:**  
The suggestions list should prioritize cities/towns directly related to the entered phrase "Satu Mare" before breaking down the entered word into smaller values. This approach would enhance the user experience by providing more relevant location suggestions.

**Actual Result:**  
The first suggestion in the list appears to be based on the word "mare" rather than the complete phrase "Satu Mare," potentially leading to the display of unrelated locations as primary suggestions.

Configure

### No Error Message Displayed When Clicking "Urmărește" with Empty Tracking Number Field

 Attach  Create subtask  Link issue 

#### Description

##### Steps to Reproduce:

- Navigate to the Cargus homepage.
- Leave the "Introdu numărul de tracking (AWB)" field empty.
- Click the "Urmărește" button.

**Expected Result:** An error message is displayed indicating that the tracking number field cannot be empty.

**Actual Result:** No error message is displayed. The button appears to have no effect.

#### Environment

- Browser: Chrome

 AIT-22 /  AIT-29

### Incorrect redirection to tracking page when clicking "Urmărește" with an empty tracking number field

 Attach  Create subtask  Link issue 

#### Description

##### Steps to Reproduce:

- Navigate to the Cargus homepage.
- Leave the "Introdu numărul de tracking (AWB)" field empty.
- Click the "Urmărește" button.

**Expected Result:** An error message is displayed indicating that the tracking number field cannot be empty.

**Actual Result:** The user is redirected to the tracking page, which asks for the tracking number again.

## URMĂREȘTE UN COLET

Urmărește livrarea și verifică locația coletelor tale trimise cu Cargus. Ai nevoie doar de numărul de AWB.
